## .NET Software Engineer

### Description

**Excel Nearshore** is seeking a skilled **.NET Software Engineer** to join the technology team of an innovative U.S.-based company operating in the property technology (PropTech) and digital solutions space. In this role, you will contribute to the design, development, and optimization of user-facing software products across desktop, mobile, and SaaS platforms. This is a fully remote and full-time position from Costa Rica, in payroll with benefits.

### Responsibilities

- Participate in software design and architecture process, ensuring scalability, performance, and maintainability.
- Contribute to code base using best practices and standard design patterns.
- Accurately estimate technical effort required for assigned tasks.
- Write and maintain documentation for code and processes to ensure effective collaboration and knowledge transfer.
- Perform design and code reviews to maintain quality, performance, and responsiveness.
- Troubleshoot and resolve technical issues, revising code as needed.
- Collaborate with cross-functional teams (Product Management, Technical Support, QA, and Engineering) to gather requirements and ensure a high-performing user experience.
- Stay updated on industry trends, evaluate new technologies, and recommend improvements to organizational effectiveness and customer service.
- Apply Agile methodologies to structure and execute releases reliably with high quality.
- Actively manage and resolve customer issues, delivering timely fixes.

### Qualifications

- Bachelor's degree in computer science or related field or relevant work experience.
- Strong communication skills, both verbal and written, for interacting with technical and non-technical stakeholders.
- Experience shipping user-facing products, desktop, mobile and SaaS platforms.
- Proficiency in .NET (and/or Python, Delphi).
- Experience with software development frameworks and libraries (e.g., React, Angular)
- Proficient in database design/management
- Strong understanding of data structures, algorithms, and software design patterns.
- Experience with version control systems (e.g., Git, SVN).
- Familiarity with cloud technologies (AWS, Azure, GCP) and CI/CD pipelines.
- Experience in debugging, troubleshooting, and optimizing existing code
- Ability to work independently and take ownership of projects.

### Hiring organization

Excel Nearshore

### Employment Type

Full-time

### Beginning of employment

ASAP

### Duration of employment

Indefinite

### Industry

Technology

### Job Location

Costa Rica

Remote work from: Costa Rica

### Date posted

January 7, 2026

- Adaptability to learn new technologies and tackle new challenges as they arise.
- Experience with Agile methodologies (Scrum, Kanban) and using project management tools (e.g., Jira, Trello).

### **Preferred Qualifications**

- Master's degree in a related field is a plus.
- Experience with DevOps practices and tools.
- Knowledge of secure coding practices in software development.
- Familiarity with mobile development (iOS/Android) or front-end frameworks (React, Angular, Vue.js).
- Contributions to open-source projects or personal projects that demonstrate expertise and passion for software development.
