Technical Project Manager (Software Development)

Description

Excel Nearshore is seeking an experienced **Technical Project Manager (TPM)** to lead the Staff Management Platform (SMP) team of a leading U.S.-based digital media and software services company. The SMP tool is central to the client's internal operations, empowering teams across the enterprise to manage, track, and model client's organizational structure, staff members, and personnel career growth paths. As TPM, you will directly manage the Agile development process in a two-week sprint cadence while capturing and prioritizing stakeholder requirements. You'll ensure the team ships high-quality digital solutions that enable strategic decision-making and operational excellence. This is a fully remote and full-time position from Costa Rica, in payroll with benefits.

Responsibilities

- Own and manage the Agile development workflow, facilitating all ceremonies including backlog grooming, sprint planning, daily standups, sprint reviews, and retrospectives.
- Collaborate with internal stakeholders to gather requirements, document new feature requests, and clearly communicate priorities to the development team.
- Act as a primary liaison between the SMP team and business units, ensuring timely delivery of project milestones.
- Foster a collaborative culture of transparency, agile learning, and incremental improvement.
- Contribute to and help refine the team's Agile practices and workflows.
- Track, report, and present project progress to management, proactively identifying and mitigating risks.
- Drive resolution of blockers across functions (Tech, HR, Corporate Operations, etc.)
- Maintain and update project documentation, workflows, and team knowledge resources.
- Lead storyboarding and wire-framing for new features or feature enhancements, collaborating closely with design and product stakeholders.
- Manage HR process cycles in conjunction with multiple HR teams across the organization, ensuring platform support for evolving business needs.
- Understand, track, and communicate compliance and privacy requirements, and coordinate with the CISO and other security stakeholders to ensure the platform adheres to the latest standards and policies.

Qualifications

- Track record of technical project management, preferably in SaaS or software engineering teams.
- Demonstrated expertise in running Agile ceremonies and two-week sprints (Scrum Master experience is a plus).
- Proven ability to elicit, document, and prioritize business and technical requirements.
- Strong background in storyboarding and wire-framing, with an eye for user
